

# **FLORENCE SAMBA testo**

*(di Lucio Starita e Mauro Becattini)*

STR1        The train is in the station  
              I'll just have to get off  
              Santa Maria Novella  
              How long ago was that?  
              Now there is some emotion  
              I'm back to my city again  
              How glad I am  
              Once again I can see it

STR2        I go to the Duomo  
              My nose is looking up  
              The dome by Brunelleschi  
              Its' even greater today  
              Here a beautiful story began  
              Then kisses were not a shame  
              How glad we were  
              Once again I remember

**RIT:**        **I love Florence**  
              **I love Florence**  
              **I Walk along the streets**  
              **I look at the green hills**  
              **Every day I'm loving more this wonderful city**

**BRIDGE (CORO)**    **I love Florence (4 volte)**  
                      **Every day I'm loving more**  
                      **This great city**

STR3        In piazza Signoria  
              We two walked hand in hand  
              And on the Ponte Vecchio  
              I bought her that cool ring  
              Now the story is still in my mind  
              We were so in love and young  
              't was like a dream  
              Once again I remember  
              How much I love  
              I love Florence  
              *I love Florence (spoken)*
